

Résumé for Politics

Emin Buğra Saral

28 Sept 1988 (36), Trabzon / Türkiye

eminbugrasaral@me.com

Short Introduction

I was born into a moderately middle-class, conservative (Muslim) and uneducated family in Trabzon. I have one disabled brother who is two years younger than me. I studied my elementary years in my hometown, then continued my high school education in Rize Anatolian Teachers High School. I got my bachelors degree in computer engineering from Koç University (Istanbul) as a non-scholarship student. In my last semester, I had an opportunity to be an exchange student at Bordeaux Management School (France) that enabled my first life experiences of meeting different cultures in foreign countries.

I actively worked together with my family during their ownership of different small shops throughout my childhood and teenage years. After my graduation from the university, I continued my professional career as a software engineer and team lead in different countries such as Türkiye, USA and Germany. I can speak English fluently while my mother tongue is Turkish.

Computer Engineering Career Summary: <https://ebsaral.vercel.app/files/cv/english.pdf>

Volunteering

2008 – 2013

- Being a programming tutor for early beginners at university
- Taking part in organizing events in management, drama and computer clubs
- Raising money and organizing events to develop and offer opportunities for children in need

2013 - 2023

- Hosting and guiding a lot of foreign visitors in Istanbul, mostly via CouchSurfing
- Being a mentor for (early) career and life advices at several organizations and workplaces
- Organizing events and being a guide within international friendship groups (mostly expats)
- Being a speaker at educational software events

Social Causes

Fairness (Equality) & Freedom within nature

- Education
- Climate change, healthcare, mental health, longevity
- Inequality, discrimination, poverty, rights of every living being

Experience in Social Causes

I began to share my findings with the title “**Nature’s Mysteries & Gifts**”.

Articles: <https://medium.com/@ebsaral>

I display a glimpse about what’s possible in nature and try to explain these topics in summaries:

- Why we get sick and how to prevent all diseases
- Why education must be fair and designed within nature’s truth and potential
- How we get our skills (talents) and how we shape each other consciously and unconsciously
- How luck is determined in nature, how to unlock everyone’s infinite luck better
- How nature’s future will look like

My Gifts: <https://github.com/ebsaral/ebsaral/blob/main/GiftsOfNature.md>

Activism

- I, rightfully, oppose the president Erdoğan’s unfair ruling and their allies for years.
- **2023:** I published an unfair workplace decision progress on LinkedIn, in order to display how politics is unfair also in Germany. I faced violence from some government officials.
- **2023:** I completed my mandatory Turkish military service in order to continue my life in Türkiye, as an anti-war person. I faced violence from some army officers.
- **2023 – 2025:** I have taken a lot of challenges to build a great amount of empathy skill on my own. After each challenge, I have gained more experience to understand nature’s details much better.

Personal Information

Religion: None

Belief: A logical approach to spirituality, emphasizing the sanctity of life for all living beings

Political Party or Side: None

Political mindset: Anti-war, anti-violence, globalism, fair capitalism, equality & freedom...

Health: I struggled with (major) depression in the past. Currently, I don’t have any disease or sickness

Current Status

I’m unemployed, with a small amount of financial debt.

I am **looking for a team or organization** to join my skills and gifts with, so we can continuously build a circle to grow together for a better world until there is **no need to fight** for social causes.

*"The best revenge is to be a better person than any enemy.
Then there is neither revenge nor enemy."*
