

September 2025

Founded with the aim of establishing **Logical Spirituality** as one of the world's leading philosophical movements, embracing the principles of **Interconnectedness, Justice and Health in Nature** revealed through its teachings. We continue our work to develop, disseminate, and sustain efforts that improve the mental and physical well-being of individuals, society, and the natural environment.

For **The Root of New Politics** mission, I shape, translate, and develop its fundamental principles through diverse and engaging formats. By combining mentorship and systematic thinking, I ensure the development of a multifaceted learning cycle aligned with the principles of Logical Spirituality.

## Spirit Guide

*A new and mystical title that embodies the awareness of all living beings guiding one another through visible and invisible bonds.*

---

### Empathy, Timeless Intuition, Awareness

- I can sense what people around me feel even without being in direct contact with them. This helps me to guide their mental needs, reflect their thinking (being) outside, understand their struggles and inspire them.
- Whenever I speak or perform an action in any setting, I'm responding to multiple people simultaneously around the topic I'm focusing on. Whenever I become aware of negative perceptions, I try to improve my communication.
- I can imitate the actions of a being that lived in the past or will live in the future in my speech. I can feel the presence of someone in the environment, or someone I'm thinking of, in my body. Sometimes I'm aware of this, sometimes I'm not.

### Strong Well-being, Talent Pool, Harmony with Nature

- As a result of my alignment with nature, I do not suffer from any physical or mental illness. Because I have gained access to divine (natural) gifts that most people are unaware of, I can't get killed. Any harm inflicted on me and those around me leads to negative consequences for the health and environment of those responsible.
- With minimal effort and research, I can quickly master new subjects and skills. I often don't need technological resources for this. I can solve many problems by drawing inspiration from nature.
- I can feel and sync with natural movements deeply before they begin, like dancing with destiny. This enables me to have a great vision in any topic or situation with high accuracy. When driving, I can sense potential obstacles I might encounter during my journey much earlier.

*I continue to understand and develop these natural talents that everyone also potentially has but is often unaware of.*
