Founded with the aim of establishing [Logical Spirituality](#) as one of the world's leading philosophical movements, embracing the principles of **Wholeness, Justice and Health in Nature** revealed through its teachings. We continue our work to develop, disseminate, and sustain efforts that improve the mental and physical well-being of individuals, society, and the natural environment.

Spirit Guide: A new and mystical title that embodies the awareness of all living beings guiding one another through visible and invisible bonds. When every human becomes aware of their bonds with each other, this title won't be needed anymore because it will be the definition of what we call human today.

For [The Root of New Politics](#) mission, I shape, translate, and develop its fundamental principles through diverse and engaging formats. By combining mentorship and systematic thinking, I ensure the development of a multifaceted learning cycle aligned with the principles of nature.
